What's New In AutoCAD?

Draw your symbols and text with the best accuracy. With up to ten million characters and an unlimited number of multiline baselines, AutoCAD 2023's new alignment features give you the freedom to draw with the best accuracy. (video: 1:52 min.) Articulate your design with powerful multiline baselines. With AutoCAD 2023's new multiline baseline articulation, you can connect entire drawing elements without the need to define each of them as a single line. (video: 1:10 min.) Make more informed decisions with more accurate drafting information. AutoCAD 2023 shows baseline line information and baseline location information on the screen for every baselines. (video: 1:27 min.) AutoCAD 2023's new planar surfaces can be used to build complex objects. You can now create a simple box by creating a planar surface and placing a drawing object in it. (video: 1:08 min.) AutoCAD 2023's new bottom-up context menu allows you to modify drawing elements and move to locations in the drawing that are defined by the current drawing element. (video: 1:32 min.) Use the new AutoShapes.Inventor extension to quickly create new objects from CAD models. (video: 1:14 min.) Navigate

to the precise location you want to draw a line. Start editing a line, and you'll instantly see the line's current location on the screen. (video: 1:25 min.) Generate Coordinate Snapshots of dynamic elements. Use Dynamic Snapshots in AutoCAD 2023 to generate Coordinate Snapshots that display a series of identical elements at the same location and orientation. (video: 1:42 min.) When you're working with multiline baselines, you can insert reference images for large areas of your drawings. You can now use a variable extent to view an image that is as large as the drawing, but is scaled and centered in the drawing. (video: 1:11 min.) Replace Your Labels: Use Control Bars to access and configure AutoCAD 2023's new shape drawing and labeling commands. (video: 1:26 min.) Use coordinates to precisely position labels. Specify the coordinate for a label and have AutoCAD 2023 automatically place and resize
